DETAILED ACTION

*Claim Rejections - 35 USC § 112*

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 3-28, 31-33, 36-42 are rejected under 35 U.S.C. 112, paragraphs 1 and 2, as the claimed invention is not described, or is not described in such full, clear, and exact terms as to enable any person skilled in the art to make and use the same, and/or failing to particularly point out and distinctly claim the subject matter which applicant regards as his invention. Specifically:

The term "suitable acylating agent" is indefinite (paragraph 2), as is seen by applicants' own confusion about what is or is not workable. Moreover, applicants have listed clearly unworkable choices, which is further evidence of this confusion, and renders the claims not enabled for such choices (paragraph 1).

The traverse is unpersuasive. Virtually of the compounds falling within the ambit of claim 9 simply will not work. Nearly all of the specific reagents listed in claims 9-10 will not work either. Applicants --- and the specification -- are confused about what will work. Applicants point to pages 21-22 of the specification as providing the required guidance, but this material is inaccurate for reasons set forth previously.

If applicants disagree, they are invited to write a balanced chemical equation for the synthesis of Formula III, using any of the reagents listed in the second line of claim 41. In fact, of the 9 reagents specifically listed in the claim, none of them will work except for ethyl chloroformate and isobutyl chloroformate.

*Claim Objections*

Claims 34-35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 41-42 are improperly dependent on claims 9 and 10 respectively. The second, third and fourth choices are not provided for in claims 9-10.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
